

# .NET API Developer

This is your chance to further your career and join an outstanding team of creative and intelligent minds with one objective: disrupt the retail technology space and build astonishing systems that will literally change the world for the better.

We are seeking an experienced .NET API Developer who can contribute significantly to the scale and success of F13 Works. In this role, you'll wear many hats and will be responsible for developing, deploying and supporting solutions to aid in reaching our goals.

F13 Works unites leading brands and influential online stores to facilitate e-commerce distribution. Reaching over 57% of all US e-commerce stores we can give manufacturers customer reach that has to-date been unattainable all while creating gains for influential online stores through increased product selection and fulfillment automation.

## **Key Responsibilities:**

- Develop API endpoints and underlying business logic.
- Good analytical, organizational, and problem-solving abilities.
- Ability to track progress against assigned tasks, report status, and proactively identifies issues. Good at prioritizing tasks to meet daily commitments.
- Participate in code reviews and code remediation, perform and develop proper unit tests and automation
- Participate in a 24 hour on-call rotation to support previous releases of the product. This includes researching problems discovered by QA or product support and developing solutions to the problems.
- Perform additional duties as determined by business needs and as directed by management.
- Strong team player / customer service orientated. Demonstrated ability to work with both end users and technical staff.
- Demonstrate the ability to present information effectively in communications with peers and project management
- Prepare any necessary technical documentation
- Retail industry experiences a bonus

## **Requirements:**

- Minimum of 3+ years of experience creating RESTful APIs.
- Minimum of 3 years Microsoft .Net Framework 4.0+ or .NET Core using C# including 2-3 years of experience in developing unit tests.
- Microsoft SQL Server 2012 or later. Must be fluent in basic T-SQL and stored procedures.

- Internet Information Service (IIS) 7 or later. Must have basic understanding of application pools, web sites, web applications, windows and basic authentication.
- Knowledgeable of SOA design principles, mocking frameworks, and performance testing
- Must be comfortable with stories, sprints, working closely with team members to complete stories in a shared working space.
- Proficient understanding of code versioning tools, such as git.
- Must be comfortable with rapidly changing and/or loosely defined requirements that are refined over time.
- Strong attention to detail.
- Excellent communication (both written and spoken) skills.

**What we offer:**

- Competitive Salary
- Stock Options
- Full benefits
- Opportunity to work with and shape a young company
